

### technicoll® 9921 Solvent for technicoll® 9116

#### Field of application

---

technicoll® 9921 is a solvent for diluting adhesives, for cleaning (substrates and tools) and for removing of oil, grease, release agents and adhesives' residues.

Uncured adhesive residues can be removed with technicoll® 9921. Solid rests or stains of adhesive containing cross linking agents cannot be removed with solvent. Before cleaning, make sure that the substrate to be cleaned will not be damaged by the solvent.

technicoll® 9921 is suitable for cleaning solvent sensitive surfaces of plastics like PVC-plasticised or polystyrene from grease, oil or dust.

Do not use technicoll® 9921 for cleaning skin.

Technical Data Sheets of technicoll® adhesives provide information about appropriate solvents.

#### Handling data and product data

---

Base	mixture of solvents
Colour	colourless
Density	0.7 g/cm <sup>3</sup>
Maximum time of storage	At least 36 month when stored in sealed original packaging in cool and dry places.
Preferred storage temperature	+10 °C to +25 °C
Behaviour at low temperature	Not susceptible to frost.
